

*Sub B1*  
~~2. (Amended) A method for processing of start-conditions according to claim 1,  
wherein said first incoming control-connector is associated with a commencing-  
activity, the commencing-activity corresponding to one of the process-activities in the process  
model, and~~

*AB*  
~~wherein said timed-evaluation-step uses as a starting point for said time-interval the  
point in time when said commencing-activity is completed.~~

~~3. (Amended) A method for processing of start-conditions according to claim 2,  
wherein said first incoming control-connector is associated with a path from said  
commencing-activity to said target-activity, and  
said timed-evaluation-step is continuing the processing to start said target-activity,  
if said associated path has been traversed.~~
